Application Form

Input ▸ Confirm ▸ Complete

If you wish to use, please enter each item.
You can also apply for use using "Attachment 1 Cyberport (Port Logistics) and CONPAS Terms of Use Agreement and Usage Application.xlsx" posted on the document page. Please refer to the FAQ page for how to apply.

- If there is a separate application for use from another branch (business office) of a company that has already been registered for use, only items with differences (example: business type) will be registered.
- CONPAS cannot be used by itself; apply for it together with Cyber Port.
- In addition, [Business type] that can use CONPAS is for "Road Transport Operator, Terminal Operator, Warehouse Operator, Forwarder, NVOCC / International Freight Forwarder" in the following input form.

CONPAS Usage Information

Using CONPAS ※ ○ Yes ○ No

Select "Yes" if you wish to use CONPAS

Announcement of the name of the company that introduced Cyber Port

We believe that it will contribute to improving the convenience of Cyber Port by increasing the number of companies that cooperate with Cyber Port in the future, as well as providing an opportunity for more companies to use Cyber Port. In principle, we will announce the number of companies that have introduced the system and the names of the companies that have introduced it.

Email address 1	Enter the applicant's email address. *Enter it even if it is the same as the administrator.
Email address 2	Enter the email address to share the status of the procedure. Contact and inquiries from the operator will be sent to both email address 1 and email address 2.

Plan Start Date	Enter the date after the second week from the application date.
Advance Usage of Verification Environment	The verification environment is a test environment built separately from the production environment used for actual operation. The main purpose is for the applicant to verify the API connection with the in-house system before starting to use the production environment. It can be used as a connection destination during the construction and repair period of the in-house system. Select "Yes" for usage. There will be a notification as soon as the connection is ready, and it can be used without waiting for the actual usage start date.
System connection	Select "Yes" if the applicant wants to connect the Cyber Port to the in-house system you are using via API. There will be a notification of the information necessary for API connection such as client ID. *Select "None" if only the Cyber Port WEB screen is planned to be used.

Use of CONPAS	Select "Yes" if CONPAS is to be used together with Cyber Port. * *CONPAS can be used only for the following Business Types. Select "None" if another Business Type is selected. Road Transport Operator, Terminal Operator, Forwarder, Warehouse Operator, NVOCC / International Freight Forwarder

☐ I agree to the Cyber Port Terms of Use.

☐ I agree to the CONPAS Terms of Use.
